

**DO NOT CROSS**

**CORDON™ 20%**

*Cordon off the gut pathogen before their **attack***

# CORDON™ 20%

## ***Non antibiotic & Non-specific chemical growth promoter***

Suitable alternative of AGP with higher purity & target dosing formulation

### **COMPOSITION:**

3-nitro-4-hydroxy phenyl arsonic acid: 200 g/ kg (20% w/w)

### **MODE OF ACTION:**

- Cordon is germicidal in action and non specifically kills gram positive and gram negative pathogens
- Causes thinning of intestinal wall, thereby improves absorptive power of intestine & Potentiates power of anti-coccidial
- Improves pigmentation of birds- improves shank colouration

### **ADVANTAGES:**

- Improves feed efficiency and ensures early attaining of marketable age without using antibiotic growth promoter or slow acting alternate of AGP
- Reduces dose of anti-coccidial when used together

### **KEY FEATURES:**

More pure – low in heavy metal content and suitably formulated with active ingredient to eliminate the chance of arsenic residue without altering the benefits in terms of growth promotion

### **USAGE RECOMMENDATION:**

250 g per ton of feed. Ensure thorough mixing with feed. Better to make premix with other ingredients before mixing in formulated diet.

**PRECAUTION:** Discontinue 5 days before slaughter

**PRESENTATION:** 25 kg bag

Poultry Feed Supplement, Not for medicinal purpose
