

Key Features:

Highly concentrated liquid cocktail of enzymes powered by Protein Optimizing Factors (POP). POP is hydrolyzed vegetable protein resulting into supplementation of bio-available amino acids.

Composition:

Each liter contains: Cellulase 100,000,000 U, Xylanase 1,500,000 U, Lipase 6,500 U, Amylase 250,000 U, Pectinase 400,000 U a Protein Optimizing Factor (POP).

Benefits:

Acts as liquid growth promoter. Reduces feed consumption. Improves weight gain ft FCR. Reduces incidences of wet litter.

Indication:

When growth is uneven in the flock, undigested feed in faeces, indigestion and less feed intake resulting into delay in attending marketable body weight.

Usage Recommendation:

1 ml for 2 liter of drinking water.

Storage:

Protect from moisture, light & heat

500ml
